

Applying knowledge to improve water quality

Pacific Northwest Regional Water Program

A Partnership of USDA CSREES
& Land Grant Colleges and Universities

Spring 2007
PNWWATER 110

Regional Expertise Directories Updated

The ten regional expertise directories developed for water resource theme areas have recently been updated by your Pacific Northwest Water Quality Team. These ten updated theme-based directories are: (1) nutrients and pesticides, (2) animal waste management, (3) drinking water and human health, (4) water conservation and agricultural water management, (5) environmental restoration, (6) water policy and economics, (7) pollution assessment and prevention, (8) watershed management, (9) storm water, and (10) urban water issues. These directories can be found at our web site: <http://www.pnwwaterweb.com>.

The Project

Land Grant Universities, Water Research Institutes, and EPA Region 10 have formed a partnership to provide research and education to communities about protecting or restoring the quality of water resources. This partnership is being supported in part by the USDA's Cooperative State Research, Education, and Extension System (CSREES).

Our Goal and Approach

The goal of this Project is to provide leadership for water resources research, education, and outreach to help people, industry, and governments to prevent and solve current and emerging water quality and quantity problems. The approach to achieving this goal is for the Partners to develop a coordinated water quality effort based on, and strengthening, individual state programs.

Our Strengths

The Project promotes regional collaboration by acknowledging existing programs and successful efforts; assisting program gaps; identifying potential issues for cross-agency and private sector collaboration; and developing a clearinghouse of expertise and programs. In addition, the Project establishes or enhances partnerships with federal, state, and local environmental and water resource management agencies, such as by placing a University Liaison within the offices of EPA Region 10.

These directories were developed for our local, state, regional, and federal partners. Each directory contains a summary statement of the issue in the Pacific Northwest, a list of desired outcomes, and contact information for the most pertinent research and/or Extension contacts at the land grant institutions in Alaska, Idaho, Oregon, and Washington. These directories also list the most relevant regional and state publications related to the specific theme area. Publication contact information for all four states is also provided. It is our intention to update the .PDF versions (on the web site) of these directories on an annual basis.

National Water Quality Program Areas

The four land grant universities in the Pacific Northwest have aligned our water resource extension and research efforts with eight themes of the USDA's Cooperative State Research, Education, and Extension System.

1. Animal Waste Management
2. Drinking Water and Human Health
3. Environmental Restoration
4. Nutrient and Pesticide Management
5. Pollution Assessment and Prevention
6. Watershed Management
7. Water Conservation and Management
8. Water Policy and Economics

CSREES is the Cooperative States Research, Education, and Extension Service, a sub-agency of the United States Department of Agriculture, and is the federal partner in this water quality program.
